## WORK EXPERIENCE

### Solution Consultant

Sahaj Software Solutions [🔗](#)

01/2018 – Present

Chennai, India

- Got Hands-on experience in building an end to end system including frontend, backend, databases, logging, monitoring, scheduling, testing, and infrastructure automation.
- Gained B2B experience while playing an important role in solving complex and critical issues. In due process, got the opportunity to learn and explore a wide range of technologies.

## PERSONAL PROJECTS

### Chat Forum (09/2017)

- Chat Forum is a chatting application developed with rich user interface. It uses core socket programming to communicate with other systems. MySQL is used to store user accounts, chat messages, logs, etc.

### MailStream (01/2018)

- MailStream is a mobile based digital marketing application which enables you to upload a csv file which contains a list of email ids. It transfers a particular mail to all the recipients contained in the csv file.

### central-logger (08/2018) [🔗](#)

- Central Logger is a tiny library for streaming the logs and information about the application to the remote server. It has used 'fire and forget' protocol to stream the logs.

### construct-react (01/2019 – 03/2019) [🔗](#)

- Construct React is a boilerplate for web development built on top of Express and React, containing modern web development tools such as Webpack and Babel. It has been bootstrapped with plenty of features like server side rendering, redux setup, axios, code splitting, etc.

### Disaster Management (11/2019) [🔗](#)

- It is a disaster management application which bridge the gap between the volunteers and the donors. It has been built using Vuejs for frontend and Python flask for backend.

### contractpy (02/2020) [🔗](#)

- contractpy is a python tiny library for validating data against a contract.

### EazyTasks (06/2020 – Present) [🔗](#)

- It is a task management application with plenty of features like categorize the tasks, labelling the tasks, marking it as completed, filtering, etc.

## EDUCATION

### Bachelor of Technology (Information Technology)

Thiagarajar College of Engineering, Madurai

- Secured CGPA of 9.2

## SKILLS

GIT

PYTHON

JAVASCRIPT

REACTJS

NODEJS

POSTGRES

MONGODB

DATA STRUCTURE

ALGORITHM

TDD

TERRAFORM

DOCKER

AIRFLOW

## INTERESTS

- Application development - Full stack
- Data structures and Algorithms

## LINKS

- Portfolio [🔗](#)
- LinkedIn [🔗](#)
- GitHub [🔗](#)

## LANGUAGES

English

Tamil

## HOBBIES

Open source contribution

Movies

Observing animals

Volunteering

Creating coding memes

Badminton

Chess

Competitive programming
